In Public Safety
it's all about
security,
safety and instant
communication.

(wireless communication)

In Public Safety
having a team you can
count on is critical to
project control.

So is your
communication
system.

Custom Communication Solutions to Take You to New Heights

Public Safety professionals must respond immediately, and they know our communication solutions will too. You can be confident that we put your needs first, back everything we sell and always bring you the latest in technology from Motorola. So please give close inspection to some of our current products and services.

Project 25 Interoperability

Project 25 (P25) is a user-driven standard for interoperability and is vital for mission critical communications. During emergencies, P25 users can easily communicate with other agencies and response teams, share vital information, and coordinate life-saving response efforts. We offer these digital solutions - solutions that work seamlessly regardless of the equipment manufacturer.

Service

Our qualified technicians are ready and able to install and configure your new Motorola equipment, handle routine repairs, or provide Motorola Original® parts and supplies to keep you communicating at full strength. No matter how complex your system is, call us at the first sign of concern and let us take care of any current or potential service issues.

Rental

From just a few units to dozens, hundreds or more, we're ready to provide two-way radio rental for your next big event, meeting, special project or virtually any short-term need. You can count on us for pre-planning assistance, through equipment preparation, and personalized help to meet your every need. Portable radios ... mobile radios ... handy accessories ... we've got them all.

Solutions from Motorola

Stop in to see for yourself all the ways Motorola can help boost productivity. Let our expertise help you design a solution that you can count on. After all, staying connected is what helps keep situations in control. Stop in or contact us today for more information.
